Variety Information

## VALOR

### General Description

Valor is a main crop variety producing high yields of large uniform white skinned creamed fleshed tubers of excellent baking and pre-packing quality. An ideal variety for organic production due to outstanding resistance to blight and potato cyst nematodes.

Combines high resistance and tolerance to PCN Ro1 and Pallida

The variety exhibits good resistance to drought and is very tolerant to heat stress which makes the variety very suitable for growing in the desert lands throughout the world.

### Agronomic Features

**Parentage:** Cara + 93.2.10

**Breeder:** Caithness Potato Breeders Ltd

**Plant Breeders Rights:** Granted 19/08/1993  
Expires 19/08/2023

### General Physiology:

**Plant:** Tall erect with few thick stems. Long mid green leaf.

**Leaf:** Medium sized narrow primary leaflets with weakly waved margin. Many large pointed secondary leaflets. Terminal leaflet overlapped.

**Flowers:** Many purple on a long thick stock. Petals very pointed.

**Berries:** Many

### Additional Variety Characteristics

**Storability:** Medium term

**Bruising:** Medium to good resistance

**Drought:** High tolerance

**Dormancy:** Mid term

**Gangrene:** Medium

**Spraing:** Good resistance

**Potato Virus Y:** Medium resistance

**Potato Leaf Roll Virus:** Good resistance

**Common Scab:** Good resistance

**Black Leg:** Good resistance

**Tuber Blight:** Good resistance

**Foliage Blight:** Good resistance
